John, Jack , Jane and Jill plan to visit the art gallery in their city. Jill reached early and waiting inside the gallery for her friends. Her friends enter a museum through a large cubical space. Below is the image seen by Jill, when her friends entered. What technique is used to draw the cube?

Source: CAAD - DRL

A. One Point perspective

C. Three Point perspective

B. Two point perspective

D. Aerial perspective

Answer key:

**B. Two Point Perspective**

Theory:

**TWO POINT PERSPECTIVE:**

Two point perspective (angular perspective) has two vanishing points on the horizon line, which don't necessarily need to be within the picture plane. If the eyelevel is below the horizon line, the viewer can see the base of the object/building

*Suggested Reading: Basics of Two point Perspective*

Which colour scheme is used to create the pattern given below?

Source: CAAD-DRL

A. Analogous colour scheme

C. Primary Colour scheme

B. Complimentary colour scheme

D. Secondary Colour scheme

Answer key:

**A. Analogous Colour Scheme**

Theory:

**Analogous colours**

The colours that are located right next to each other on the colour wheel.

**Suggested Reading: colour theory**

In a 800 m race around a stadium having the circumference of 200 m, the top runner meets the last runner on the 5th minute of the race. If the top runner runs at twice the speed of the last runner, what is the time taken by the top runner to finish the race?

At 5<sup>th</sup> minute

Circumference 200 m

A. 20 Min

B. 10 Min

C. 15 Min

D. 5 Min

Answer key:

Theory:

After 5 minutes (before meeting), the top runner covers 2 rounds i.e., 400 m  
And the last runner covers 1 round i.e., 200 m.  
Top runner covers 800 m race in 10 minutes.

**B. 10 Minutes**

In a housing society, 30 per cent of the residents are men over the age of 18 and 40 per cent are women over the age of 18. If there are 24 children living in the housing society, then how many total residents live?

A. 32

B. 80

C. 94

D. 112

**Answer key:**

**B. 80**

**Theory:**

Residents as men of 18+ = 30%

Residents as women of 18+ = 40%

No. of children = 24

Let the total no. of residents be 'x'.

So, there are (100 - 30 - 40)% children in the house.

From the above,

$$0.30x = 24$$

$$x = 80 \text{ residents}$$

Which stage of the design thinking process involves brainstorming and generating multiple ideas?

A. Define

B. Ideation

C. Prototype

D. Test

Answer key:

B. Ideation

Theory:

The ideation stage in design thinking is where architects brainstorm and explore various ideas without judgment, aiming to generate a wide range of potential solutions to the problem at hand.

A tourist is shooting photographs of an ancient building from four locations A, B, C and D marked by x. The tourist is using only one camera without changing its magnification. Identify the location(s) in the floor plan which will result in the given photograph.

Photograph

A. A,B,C

B. A,C,D

C. A,D

D. B,D

Answer key:

C. A,D

## Theory:

**A,D: We can infer the following from the figures:**

I1: On either side of the centre, we can count a total of 5 columns each on left and right sides.

I2: We can also view partially the outer row of columns aligning with the 3rd and 4th columns on the left and right sides.

With these observations let us consider each position –

A – All the above conditions are satisfied. It is one of the right positions.

B – I 1 is satisfied but I 2 is not as this view does not have a column aligning with the 4th column on the left

C – I 1 is not satisfied as there are a total of only 4v columns on each side.

D – Satisfies I1 and 2 and so Is also the correct option.
